Ibrahim Abdull — CV content

Contact

- Name: Ibrahim Abdull
- Title: Mechatronics Engineer & Founder, Maarifu
- Location: Dar es Salaam, Tanzania
- Email: abdullibrahim733@gmail.com
- Phone: +255 783 414 177
- LinkedIn: linkedin.com/in/ibrahim-abdull-5555933b2

Summary

19-year-old mechatronics engineer and founder of Maarifu, building AI, robotics, and embedded systems for Africa. Founded and leads development of Olive AI (business automation agents), Ghost (an embedded-systems programming language), Siafu (swarm robotics), and Jifunze (offline edtech kiosks for schools).

Projects

- **Olive AI** — AI agents automating business logistics and enterprise workflows.
- **Ghost** — Domain-specific systems programming language compiled via LLVM; targets STM32F411, ESP32, ESP32-S3. Build tooling and linker flows working.
- **Siafu** — Swarm robotics platform: OpenSCAD hardware models, Webots simulation, embedded controller. Named for the army ant.
- **Jifunze** — Raspberry Pi Zero 2 W education kiosk delivering offline lessons to secondary students; deployed prototype (TRL 6+).
- **KukuPlus** — Agri-tech product line.
- **NECTA Mastery Pack** — Digital study packs for Tanzanian NECTA exams, sold on Gumroad to fund R&D.

Technical Skills

- Embedded: ESP32/ESP32-S3/STM32, I2S audio, FreeRTOS-style firmware, PlatformIO
- Languages: C, C++, Python, Rust, Ghost (own language), assembly basics
- Tools: LLVM toolchains, OpenSCAD, Webots, KiCad, Git, Linux
- AI/ML: LLM-based agent systems, local inference (llama.cpp), faster-whisper STT, Pocket TTS

Education

- BSc Mechatronics Engineering (in progress)
